DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-38, 60-64, drawn to an excavator, classified in class 299, subclass 85.1.
 - II. Claims 35, 40, 42-43, 65 drawn to method of excavating using swing actuators, classified in class 299, subclass 74.
 - III. Claims 44-46, drawn to method of detecting hydraulic failure, classified in class 702, subclass 114.
 - IV. Claims 47-52, drawn to method of controlling hydraulic pressure, classified in class 405, subclass 302.
 - V. Claims 53-56, drawn to method of controlling pitch and roll, classified in class 701, subclass 37.
 - VI. Claims 57-59, drawn to method of controlling profile, classified in class 299, subclass 1.05.
 - VII. Claims 67-74, drawn to method of controlling thrust pressure, classified in class 405, subclass 143.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process.

Art Unit: 3673

(MPEP § 806.05(e)). In this case the apparatus can excavate without using swing actuators to rotate the boom.

Inventions Group III and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can excavate without having a fail-safe hydraulic system.

Inventions Group IV and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be used with an apparatus lacking grippers such as a road-milling machine.

Inventions Group V and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can excavate without using pitch and roll data.

Inventions Group VI and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as

Art Unit: 3673

claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus can excavate without using profile data.

Inventions Group VII and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case an apparatus lacking grippers such as a road-milling machine can perform the process.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
